

LESSON PLAN

SPECIFIC OBJECTIVES

The students

- learn about the human body
- know about different external parts
- are able to understand the functions of different body parts

TEACHING AIDS

A labelled picture of the human body, pictures of different body parts and pictures of different pet animals, blackboard, chalk, duster, chart paper, etc.

TEACHING STRATEGY

- First the teacher will show the picture given in 'Warm Up' and ask the students to draw the parts.
- The teacher will then introduce the important parts of our body. To introduce or explain each part, he/she may show/do some activity related to that particular part, e.g., clap for explaining hands.
- In each and every case, the teacher will involve the students.

BOOST UP

- The teacher can relate the functions of the parts.
- The exercises will help in checking what the student has learnt.

EXPECTED LEARNING OUTCOMES

The students are able to

- understand about their body parts
- know the functions of the different body parts

EVALUATIVE QUESTIONS

The teacher may ask the following questions for evaluating his/her students.

1. Name any three parts of our body.
2. Which organ helps us breathe?

3. Which organs help us see?
4. What do you do with your hands?
5. What do you do with your ears?
