

A Long and Healthy Life

3

LESSON PLAN

SPECIFIC OBJECTIVES

The students will learn about

- general health
- the invention of clinical thermometer
- the invention of stethoscope
- the invention of microscope
- the invention of new machines
- surgery
- medicines
- prevention of diseases
- basic health care

TEACHING AIDS

Chart papers, flashcards, models, blackboard, duster, chalks, etc.

TEACHING STRATEGY

- First, start with Warm Up.
- Tell about general health.
- Tell about clinical thermometer.
- Tell about stethoscope.
- Tell about microscope.
- Tell about new machines.
- Tell about surgery.
- Tell about medicines.
- Tell about prevention of diseases.
- Tell about basic health care.

BOOST UP

- The teacher may show cuttings from newspapers and magazines regarding new inventions and discoveries in the field of medical science.
- The teacher may show photographs of different medical instruments.
- The teacher can initiate a discussion on the topic given in Think and Answer.

EXPECTED LEARNING OUTCOMES

The students will be able to understand about

- general health
- the invention of clinical thermometer
- the invention of stethoscope
- the invention of microscope
- the invention of new machines
- surgery
- medicines
- prevention of diseases
- basic health care

EVALUATIVE QUESTIONS

The teacher may ask the following questions to evaluate the students.

1. What is the use of medical instruments?
2. What is the use of a stethoscope?
3. What is the use of laser beams?
4. Why is Louis Pasteur famous in medical science?
5. How can we keep ourselves healthy?
