

## LESSON PLAN

### SPECIFIC OBJECTIVES

The students will learn about

- the Earth—a planet
- the shape of the Earth
- things which live help us to on the Earth
- the types of land on the Earth

### TEACHING AIDS

A chart paper, a projector, a blackboard, chalk, duster, etc.

### TEACHING STRATEGY

- First, the teacher will start with the exercise given in Warm Up.
- Then, the teacher will tell about the Solar System and the earth, a planet.
- The teacher, then, will tell about the shape of the earth.
- After this, the teacher will tell the things that help sustain life on it.
- Then the teacher will tell about the types of land on the Earth.

### BOOST UP

- The teacher may use charts.
- The teacher may use models, globes, maps, etc.
- The teacher may use video clippings from ISRO and NASA.
- The teacher will initiate a discussion on the topic given in Think and Answer.

### EXPECTED LEARNING OUTCOMES

The students will be able to learn about

- the Earth—a planet
- the shape of the Earth
- the things which help sustain life on it
- the types of land on the earth

### EVALUATIVE QUESTIONS

The teacher may ask the following questions.

1. How many planets are there in the Solar System?
2. Name the planets.
3. What does our Earth look like?
4. What is a tableland?
5. What is an island?
6. What is a sea?
