

## LESSON PLAN

### SPECIFIC OBJECTIVES

The students will learn about

- the environment
- air pollution, land pollution and water pollution
- ways to take care of the environment
- noise pollution
- some natural disasters (case study)

### TEACHING AIDS

Chart papers, flashcards, models, blackboard, duster, chalks, etc.

### TEACHING STRATEGY

- First, start with Warm Up. The exercise will introduce the theme to the students.
- Tell about environment—natural and man-made.
- Tell about how our environment gets polluted.
- Tell about air pollution in detail.
- Tell about land pollution in detail.
- Tell about water pollution in detail.
- Tell about noise pollution in detail.
- Tell about the ways to take care of environment.
- Tell about a few natural disasters that occurred in India in the past.
- Tell about the preventive measures we can take against disasters.

### BOOST UP

- To make the lesson interesting, the teacher may show chart papers.
- The teacher may show flashcards.
- The teacher may take the students to a river bank to show water pollution.
- The teacher will ask the students to solve the exercises in the lesson.
- The teacher will initiate a discussion on the topic given in Think and Answer.

## EXPECTED LEARNING OUTCOMES

The students will be able to understand about

- the environment
- air pollution, land pollution and water pollution
- ways to take care of environment
- noise pollution
- some natural disasters (case study)

## EVALUATIVE QUESTIONS

The teacher may ask the following questions to the students to evaluate them.

1. Why do human beings change the natural environment?
2. What causes air pollution?
3. What causes water pollution?
4. How can we take care of the environment?
5. What saves lives during a natural disaster?
