

# 4. Programming with Scratch

## WORKSHEET

### I. Fill in the blanks.

1. \_\_\_\_\_ is used to run a block a particular number of times.
2. \_\_\_\_\_ is where the sprites perform, move and interact with each other.
3. The default sprite is a \_\_\_\_\_.
4. The \_\_\_\_\_ block is known as a loop.
5. The \_\_\_\_\_ block is a Control block.

### II. Write True or False.

1. Scratch was developed at MIT.
2. A sprite is rigid and no action can be performed on it.
3. Various instructions like move, rotate and play music to a sprite are given by us.
4. The forever block runs the block over and over again.
5. The first test version of Scratch was released only this year.

### III. Find seven words related to the Scratch program in the given grid.

Q	R	B	S	C	R	I	P	T	R	S
F	D	B	E	K	R	E	T	S	D	P
O	R	U	Q	N	Z	W	G	J	T	R
