

# Periodic Test Paper - 2

(Units 1-2)

Time: 1 hour

Maximum Marks: 50

**A. Read the passage given below and answer the questions that follow.**

**(10 marks)**

Water is one of the most essential natural resources. It is found in an adequate amount on earth. It is an essential source for the existence of life on our planet. It is widely used for various purposes such as drinking, washing, bathing, cleaning, cooking and irrigation. About 70 per cent of the Earth's surface is covered with water. The three main sources of water are: Rainwater, Groundwater – This includes water bodies like wells and springs. Surface water – This includes different water bodies like reservoirs, rivers, streams, ponds, lakes and tanks. We all need water for different daily activities. Similarly, we need water for the growth of seed. Without water seed will dry up and wither of. Nothing will grow on earth. The presence of water on earth is essential. We must try to save every drop of water.

**I. Answer the following questions.**

1. How is water an essential resource for life on the earth?
2. How much earth's area is covered with water?
